AI Leader specialized in enterprise AI adoption, initiative management, and generative AI-enabled transformation. Experience identifying and prioritizing use cases, coordinating cross-functional teams, and turning business needs into deployable solutions.

EXPERIENCE

Grupo Salinas, Mexico City

April 2025 - Present

AI Manager

- Designed and delivered **generative AI adoption programs for directors and business teams**, focused on applying tools like Claude to real analysis, research, documentation, and decision-making workflows.
- Design and run **generative AI adoption programs for directors and managers**, focused on embedding tools like Claude into everyday workflows.
- Led AI initiatives for financial services, including **microcredit origination and underwriting solutions** covering identity, risk, decisioning, offer, and collections.
- Led the development of **biomedical analysis solutions, combining predictive models and generative AI** to support clinical analysis processes.
- Coordinate **international AI and software projects** with teams and clients in Mexico and the United States.

Grupo Salinas, Mexico City

October 2024 – March 2025

AI Consultant

- Contributed to building a **financial education platform with a virtual assistant**, integrating UX, frontend, and AI capabilities.
- Built a **real-time operational analysis solution for SPEI transactions** using FastAPI, AWS Lambda, and Redis.
- Evaluated and implemented **generative AI, synthetic voice, and machine learning technologies** across multiple use cases.
- Worked on AI consulting projects for teams and clients in **Mexico and the United States**, including work with stakeholders in San Diego.

EDUCATION

Instituto Tecnológico y de Estudios Superiores de Monterrey, Mexico City

2024

B.Eng. in Computer Systems Engineering

GPA: 93/100

Coursework in Artificial Intelligence, Data Science, Software Systems Development, and Advanced Algorithm Analysis and Design.

Instituto Tecnológico y de Estudios Superiores de Monterrey, Mexico City

2023

Specialization in Data Analytics and Artificial Intelligence

Coursework in Machine Learning, Deep Learning, and data analysis applied to business problems.

Huawei Global Training Center, Hangzhou, China

2024

Advanced Specialization in Neural Networks

Selected to take part in the **INFOTEC IA 1000 Learning Journey** after achieving one of the highest national scores on Huawei's HCIA-AI certification.

SKILLS

AI Management: project management, use-case definition, prioritization, cross-functional coordination, stakeholder management, and AI adoption.

Artificial Intelligence: generative AI, RAG, multi-agent systems, machine learning, AWS Bedrock, Claude, Scikit-Learn, and PyTorch.

Technology: Python, SQL, HTML, CSS, FastAPI, React, and Git.

Analysis: Pandas, NumPy, Matplotlib, and Plotly.

Languages: Native Spanish, English C1, German B2.

CERTIFICATIONS

- Infotec IA 1000 Learning Journey (Huawei)
- Huawei HCIA – AI (Huawei)
- Leadership Diploma (Tec de Monterrey)

AWARDS

- CENEVAL Award** for Excellence in the EGEL Exam, awarded for achieving an **outstanding result** on Mexico's National Undergraduate Exit Exam (EGEL) in Software Engineering.
